Hopefully it's something on her end and she can fix it quickly.

Thanks, I'm still getting the "awaiting approval" message...it shows up when you hover over the hourglass in the screen capture below. I'll contact Gobeail and see if we can get it resolved. Thank you for checking.

Thank you,
Tim

Hi Tim,

Gobeail McKinley asked that I check on you to see if you were able to get the SPeCTs site to work and get registered okay. If not just let her know.

Josh

Josh,

Thank you very much for the discussion and explanation. Also, I am in the process of getting my SPECS account fully active. I am currently in the "awaiting approval" category, but I can also have someone else here submit the documents, so we should be in good shape on that.

Thank you,
Tim

Subject: TCEQ 2020 Exceptional Event

Good Afternoon Tim,

As we discussed this morning, this email is to inform you of EPA's decision to not review one event day from TCEQ's 2020 exceptional event demonstration. The event day and monitor are Dec. 23, 2020 and the Mimosa Dr. monitor(AQS # 48-141-0038). The reason for EPA's decision is that in keeping with 40 CFR 50.14 (Treatment of air quality monitoring data influenced by exceptional events.) the event in question does not have regulatory significance. Since the Mimosa Dr. monitor already has an exceedance from April of 2020, acting on the Dec. event will not change the Mimosa Dr. monitor's Design Value such that it would be below the NAAQS threshold for PM10. EPA will continue to review the rest of the EE demonstration as it has regulatory significance. If you have any questions please feel free to reach out to me. Thank you.

Josh Madden
